SUMMARY

I am a Flutter App Developer with experience building scalable Android and iOS applications using Flutter, Dart, GetX, Firebase, REST APIs, Socket.IO, and WebRTC. Skilled in developing production-ready applications, optimizing performance, and implementing clean architecture.

EXPERIENCES

Jr. Executive Mobile App *Jan 2026 – Present*

Softvence Omega, Betopia

- Developed cross-platform Android & iOS apps using Flutter and Dart.
- Integrated REST APIs, Firebase, Socket.IO, and WebRTC.
- Built responsive UI with GetX and Riverpod state management.
- Optimized app performance and fixed production issues.
- Published and maintained apps on Google Play and Apple App Store.

PROJECTS

Taco — Ride Sharing Platform ***Client*** ***Conductor***

- Built a real-time ride-sharing platform with live tracking, chat, Google Maps, and fare negotiation using Flutter, REST APIs, Socket.IO, and GetX.
- Integrated Stripe, Orange Money, and Wave payments; deployed apps for Google Play and App Store.

Raíz — Social Networking Platform ***Raíz***

- Developed a role-based social platform with chat, audio/video calling, stories, campaigns, rewards, ai chatbot and push notifications using WebRTC, Socket.IO, and Firebase.
- Built a marketplace with Stripe payments, maps, deep links, secure authentication, and device session management.

LinkYetu — Education Platform ***LinkYetu***

- Developed a multi-role education platform that combines social networking, event management, job opportunities, and learning progress tracking for students, teachers, universities, recruiters, and partners.
- Built features including social feeds, event organization, job search, role-based access, and community engagement using Flutter, GetX, Firebase, REST APIs, and Socket.IO.

MotorSpot — Racing Community Platform ***Motorspot***

- Built a Flutter-based racing community app with social feed, real-time chat, leaderboards, events, campaigns, and role-based user access.
- Developed interactive features including Head-to-Head battles, Raw Shift competitions, Official Partner registration, AI chatbot, and post sharing using GetX, Firebase, and Socket.IO.

48 Hours — Dating Platform ***48 Hours***

- Built a scalable cross-platform Flutter app with GetX, feature-based modular architecture, responsive design, and reusable widgets for a clean, maintainable codebase
- Developed a complete authentication flow (splash, welcome, phone number, OTP verification) inspired by Bumble's onboarding, following Clean Architecture principles

EDUCATION

Daffodil International Univercity

BSc. in Software Engineering
(Major in Data Science)

2023 - 2027 (Expected)

SKILLS

Programing Language

- Dart
- Kotlin
- Java
- Python
- C

FrameWork

- Flutter
- Jetpack Compose

State Management

- Getx
- Riverpod

Backend & APIs

- REST APIs
- Socket.IO
- WebRTC
- Agora RTC & RTM
- Firebase

Architecture

- Clean Architecture
- MVC / MVVM
- OOP

Tools & Services

- Maps (Google Map, MapBox, Tom Tom, Flutter Map)
- Payments (Stripe, Orange, Wave)
- Git & GitHub
- Deep Link
- Firebase (Push Notifications, Auth)
- Android Studio
- VS Code
- API Testing (Postman, Swagger, Fast)
- Xcode
- Database (SQL, Shared Preference)
- AI (Claude, Gemini, Chatgpt with Token Optimized)

LANGUAGE

- Bengali (native)
- English (Professional)
- Hindi (Conversational)
